

News from Nursery

Nursery set off for the woods together, all dressed up for the cold. On the way the children looked out for and listened for birds. Once in the woods, the children each found two sticks. They then used the sticks to tap out some rhythmic patterns and sing a song together.

We made a giant, circular 'nest' out of sticks and foliage. The children were introduced to different native birds. They looked at the colours and patterns of the feathers and had a go at listening to the bird calls which they made. Some children then took the birds to play with independently in the woods.
