HARVEST FESTIVAL

For Harvest, we looked at why we celebrate and give thanks for the food we eat. The children were interested in how food grows!

We explored fruits and vegetables and how some grow in trees and some grow in the ground.

We learnt a song all about how a bean grows and this taught us what a bean needs to grow.

The children performed this in the church.

To add to this we created art using a variety of media to show the different parts of the beans cycle.

We made a bean using paint, a raincloud using our hand prints and hands as the rain, a sun using collage and a bean stalk out of tissue paper - the children each made a pea pod with three peas inside. This helped us to remember the aspects of the song work on our fine motor skills and count our peas as we placed them into our pea pods.
